1. The CRP test is a sensitive indicator of inflammatory processes.

Sample Type : **SERUM**

Sample Collection : **01-Apr-2024 08:09 PM**

2. The determination of the CRP level can be used in therapy control.

Reff By : **C/O SRADDHA**

Sample Received : **01-Apr-2024 08:20 PM**

3. As with all the diagnostic methods, the final diagnosis should not be based on the result of a single test, but on a correlation of test results with other clinical findings.

Reff By : **Bharat Saini**

Reporting Date : **02-Apr-2024 05:51 AM**

4. The strength of agglutination is not indicative of the CRP concentration in the samples tested.
